SPEDO 9700 SLITTER MERGER

The SPEDO 9700 SLITTER MERGER is used to centre split stationery and merge forms prior to sheeting with a Spedo cutter.

The 9700 Slitter Merger is available in two different control configurations.

The 9700S (standard) version, for use with older Spedo cutters where ENET communications are not available.

The 9700E (enhanced) version, which allows ENET communication with the Spedo cutter for greater speed control.

Both versions are available with and without printer interface.

- The new outfeed system has been designed to allow the Spedo 9700 Slitter Merger to merge faster and more reliably.
- Changing the configuration from left to right can be done quickly without tools.
- Magnetic form guides and retractable tray keep the web off of the ground.

SPECIFICATIONS
